Download software & tools

to get the most out of ichat, you should use [Netscape Navigator](#) and the [ichat plugin](#) or [Microsoft Internet Explorer](#) (no plugin required).

ROOMS =>

create private room.

You may create a private room by entering the following information and then selecting the Create button below. After the room is created, you will:

1. become the room owner and you will be placed in the new room
2. be able to **invite** other users into the room and/or allow other users to **goto** you so that they may enter your private room
3. have one exit in your room, leading to the default start location of the world

NOTE: You are only allowed one private room at one time, *and the room will disappear when the last user leaves the room* .
